# ➤ What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get will depend on the exchange rate between the Higher risk two currencies. This risk is not considered in the indicator shown above.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Fund's Prospectus available at www.ttint.com.

This product does not include any protection from future market performance so you could lose some or all of your investment.

### Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average and best performance of the product/benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Example investment: \$ 10,000		1 year	5 years			
Minimum	There is no minimum guaranteed return. You could lose some or	There is no minimum guaranteed return. You could lose some or all of your investment.

### What are the costs?

### Cost over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

Example investment: \$ 10,000	If you cash in after 1 year	If you cash in after 5 years
Total costs	\$ 382	\$ 1,907
Annual cost impact(*)	3.82%	2.70%

(\*)This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 10.35% before costs and 7.65% after costs.

### Composition of costs

The table below shows the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period and the meaning of the different cost categories.

The table shows the impact on return per year		If you exit after 1 year		
or exit	Entry costs	0.40% of the amount you pay in when entering this investment.	\$ 40	
	Exit costs	1.00% of your investment before it is paid out to you.	\$ 100	
Ongoing costs taken each year	Management fees and other administrative or operating costs	1.13% of the value of your investment per year. This is an estimate based on actual costs over the last year.	\$ 113	
	Transaction costs	1.24% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	\$ 124	
Incidental costs taken under specific conditions	Performance fees and carried interest	There is no performance fee for this product.	\$ 0	

## How long should I hold it and can I take my money out early?

### The recommended minimum holding period: 5 years.

The Fund is designed to be held over the medium to long term and we recommend that you hold this investment for at least 5 years.

You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the sub-fund on any business day (as set out in the Fund's prospectus).

If you cash in at an early stage this will increase the risk of lower investment returns or a loss.

## How can I complain?

If you have any complaints about the product, the conduct of the PRIIP manufacturer or the person advising on, or selling the product, complaints can be lodged via the following methods:

i. E-mail: ttcomplianceteam@ttint.com

ii. Mail: TT Compliance, TT International, 62 Threadneedle Street, London, EC3N 4AL
