➤ What is this product?

Type: This Fund is a UCITS.

Term: No fixed term.

Objectives: The investment objective of the Fund is to produce long-term capital growth.

The Fund is actively managed and invests in a diversified portfolio of equity and equity-related securities such as depository receipts, American depository receipts, global depository receipts, single and index stock participation notes or other securities having equities as the underlying instrument i.e. equity linked notes, fully funded equity swaps and convertible bonds, which are or for which the underlying securities are traded in Emerging Markets (as defined by reference to the MSCI Emerging Markets ex Fossil Fuels Index (the "Benchmark Index")). The Benchmark Index is an index of securities across a number of global markets classified by the Benchmark Index as Emerging Markets, whilst excluding companies that own oil, gas and coal reserves. The Benchmark Index rebalances on a quarterly basis.

Under normal market conditions the Fund will invest at least 80% of the Net Asset Value of the Fund in (i) equity or equity related securities of companies included in the Benchmark Index, and/or (ii) in equity or equity-related securities of companies which are not included in the Benchmark Index, but where the issuer in question has its registered office, or domicile, located in, or in the opinion of TT International Asset Management Ltd (the "Investment Manager"), exercise the majority of their economic activity in the countries of the Benchmark Index and/or (iii) in equity or equity-related securities traded, or for which the underlying securities are traded, on the exchanges of the countries included in the Benchmark Index (including common and preferred stocks, warrants and fixed and floating rate convertible and hybrid fixed-income debt securities including non-investment grade debt securities of corporate and government issuers worldwide (not more than 5% of the Net Asset Value of the Fund may be invested in such securities)). Non-investment grade debt securities are debt securities that are rated BB+ or lower by a rating agency, or are unrated but determined by the Investment Manager to be of comparable quality.

Up to 20% of the Net Asset Value of the Fund may be invested in non-benchmark securities.

The Fund may participate in initial public offerings of equity or equity related securities of the types described above if the Investment Manager determines participation to be appropriate.

The Fund may also invest up to 10 per cent. of the total Net Asset Value of the Fund in open-ended collective investment schemes.

The Fund may buy and sell futures and options (comprising options on futures, options on indices and ETFs and stock options), in pursuit of the investment objective and to gain exposure to the instruments and Benchmark Index as well as for efficient portfolio management purposes.

The Fund promotes environmental and/or social characteristics by investing a minimum of 80% of its assets in companies that the Investment Manager believes contribute to the UN Sustainable Development Goals through their operations and/or their products. The Investment Manager will also adopt a UN Global Compact violations filter so that any company that has grave and ongoing violations of the principles with no rectification plan will not form a part of the Fund's portfolio.

➤ What are the costs?

Costs over time

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10,000 is invested

Example Investment: GBP 10,000	If you cash in after 1 year	If you cash in after 5 years
Total costs	GBP 193	GBP 1,090
Annual cost impact(*)	1.93%	1.93%
