## **TT International appoints Michael Tambue as Emerging Markets Investment Specialist**

Tambue bolsters TT's leading EM franchise

**19th June 2025, London:** TT International ("TT"), an alpha-driven specialist investment manager, announces the appointment of Michael Tambue as an Emerging Markets Investment Specialist for its Emerging Markets franchise across equities and fixed income. Tambue, a seasoned investment specialist with close to 20 years of market experience, joins to support the development of the Emerging Markets Equity and Debt strategies, covering long-only and alternatives.

Tambue previously worked alongside Jean-Charles ("JC") Sambor, TT's Head of Emerging Markets Debt, and much of the current EM Debt team, including Alex Zunega, Stefan Roessler, Ronald Huang and Michael Lam, while at BNP Paribas Asset Management on the Emerging Markets Fixed Income investment and trading desks. These core team members have worked together for eight years and were joined by Di Wang in 2024 when they transitioned to TT. Their long-standing collaboration and complementary expertise underpin a robust, differentiated institutional investment process that continues to deliver strong results for clients.

Most recently, Tambue was the Emerging Markets and Frontier Sales Director at global asset management firm, Record.

**Eric Mackay, Managing Director, TT International, said:** "Michael is a very well-respected investment specialist in the EM space, so we're delighted to welcome him to the team. Since launching our first Emerging Markets product in 2011, we have consistently enhanced our offering. Michael's appointment reinforces our commitment to delivering high-quality, cross-asset EM solutions and underpins our focus on serving the evolving needs of our clients."

**Jean-Charles Sambor, Head of Emerging Markets Debt, TT International, said:** Michael's appointment highlights TT's growth intentions very clearly. Having worked with Michael in the past at BNP, our team are familiar with his expertise, and I am optimistic about his impact on our EM franchise."

**Robert James, Emerging Markets Equities Portfolio Manager, TT International, said:** “Michael will be vital in enhancing our capabilities across all EM asset classes. Our goal is for TT to deepen our well recognised expertise in Emerging Markets”.

**End**
