## Investment Strategy

TT believes that Emerging Markets are structurally inefficient due to a number of factors. Their undeveloped domestic savings bases mean that many rely on foreign flows of capital. In addition, many listed Emerging market companies are very poorly researched. Also, the composition of the index makes it skewed towards the more developed country and stock components.

The TT EM Unconstrained strategy aims to exploit these many inefficiencies. It expects to be structurally biased towards the higher growth countries with strong demographics, and dynamic consumption. This is likely to give a bias away from the larger countries in the index. Being unconstrained, however, the strategy will aim to invest in whichever Emerging Market countries and stock names are perceived to offer the most attractive risk-return profile.

The stock selection process is one of rigorous fundamental analysis by our experienced team of Portfolio Managers and Analysts based in both London and Hong Kong. The team go through a process called VVC – Valuation – Verification – Catalysts, combined with an integrated assessment of Environmental, Social, and Governance (ESG) issues. As part of the Verification role, the team regularly engage with management, and also like to ascertain a broad understanding of the business through meeting competitors, customers and suppliers where possible. The team also like to focus much of their analysis and engagement around Free Cash Flow to understand the potential and ability of the company to grow, and ultimately to return capital to shareholders.

The ultimate portfolio is concentrated and high conviction. It contains no more than 40 of our best attractively valued growth ideas, unconstrained by the benchmark.

## Why TT?

TT International offers a range of long-only and hedge fund strategies designed to meet clients' investment objectives and risk budgets. We have over 30 years' experience of conviction investing and a strong track record of delivering compelling risk-adjusted returns.

TT manages assets for a growing institutional client base, which is increasingly diverse in type and location.

To align our interests, TT's investment teams are compensated based on the returns they deliver to clients, and many of our employees also invest their own assets alongside those of our clients.

Furthermore, we believe that investment performance suffers from diseconomies of scale if assets under management grow too large. We therefore limit capacity in all of our products, enabling us to remain nimble and maximising our chances of success. Rather than simply being asset gatherers, we pride ourselves on our investment-led culture that focuses on doing what is right for existing clients.
